DUNLOP LAUNCHES NEW HYPERFIBRE XT SQUASH RACKET SERIES

Designed to deliver ultimate power and speed to take your game to the next level.

Dunlop unveils the new premium Hyperfibre XT Series, its most technologically advanced squash racket range to date.

The Hyperfibre XT range will deliver ultimate levels of power and speed. Its advanced frame aerodynamics make the rackets ultra manoeuvrable and allow for easier power generation – these rackets are designed to help players hit harder taking their game to the next level.

The range, which is an evolution of the Hyperfibre+ series, is endorsed by Team Dunlop including powerhouse husband and wife duo, men’s world number one, Ali Farag and women’s world number five and former US Open champion, Nour El Tayeb.

The Hyperfibre XT series features improved use of Dunlop’s Hyperfibre technology, in the head of the racket which enhances the swing weight of the racket to help players generate explosive power whilst improving the stability and durability of the racket.

“The launch of Dunlop’s Hyperfibre XT Series is a testament to Dunlop’s continual journey to create the world’s best rackets” said Jamie Douglas, Global Marketing Director for Dunlop Racket Sports. “Developing rackets which enhance the elements of power and speed will pave the way for more dynamic and exciting play for players and fans.”
